

Curiosités

May 5th 2023

Much talk about attention, and “the attention economy”
but
less mentions of curiosity (outside the Cabinet).

One question:
Can there be a “curiosity economy”?

Is it another name for the same thing?
A whole different world?
A contradiction in terms?

Attention is becoming automated,
and a good thing too...
(can't keep up, *non posso piu*, *Jean Peuplus*)

Can there be
automated curiosity?
